

PROCEEDINGS OF THE THIRD INTERNATIONAL CONFERENCE ON UNSATURATED SOILS,
UNSAT 2002, 10-13 MARCH 2002, RECIFE, BRAZIL

Unsaturated Soils

Edited by

J.F.T. Jucá

Universidade Federal de Pernambuco, Brazil

Tácio M.P. de Campos

Pontifícia Universidade Católica do Rio de Janeiro, Brazil

Fernando A.M. Marinho

Escola Politécnica da Universidade de São Paulo, Brazil

VOLUME 1

A.A. BALKEMA PUBLISHERS LISSE / ABINGDON / EXTON (PA) / TOKYO

Organized by
Universidade Federal de Pernambuco (DEC/UFPE)
Pontifícia Universidade Católica do Rio de Janeiro (DEC/PUC-Rio)
Universidade de São Paulo (EPUSP)

Under the auspices of
International Society for Soil Mechanics and Geotechnical Engineering
TC6 Committee on Unsaturated Soils
Associação Brasileira de Mecânica dos Solos e Engenharia Geotécnica
Comitê Brasileiro de Solos Não Saturados

Sponsored by
Brazilian Ministry of Science and Technology (through CNPq and FINEP)
Brazilian Ministry of Education (through CAPES)
Government of the State of Pernambuco (through FACEPE)
PRONEX/CNPq project at the Civil Engineering Department / PUC-Rio

For the complete set of volumes: ISBN 90 5809 371 9
For volume 1: ISBN 90 5809 372 7
For volume 2: ISBN 90 5809 373 5
For volume 3: ISBN 90 5809 374 3

Printed in The Netherlands

Table of Contents

<i>Preface</i>	IX
<i>Organization</i>	XI
<i>1. Developments on Theoretical, Modelling and Numerical Analysis on Unsaturated Materials</i>	
<i>1.1 Water flow</i>	
Coupled finite element analysis of infiltration into unsaturated soils <i>P.G.C. Smith, T.I. Addenbrooke & D.M. Potts</i>	3
Prediction of hydrological parameters by mechanical stress states <i>Th. Baumgartl, R. Horn & B.G. Richards</i>	9
Simulating infiltration with stress-dependent water retention and conductivity relations <i>J.R. McDougall, I.C. Pyrah & A. Tarantino</i>	15
Fractal model for water flow through unsaturated soils <i>Y.F. Xu, D.A. Sun & J.H. Wang</i>	21
Hydraulic conductivity of unsaturated soils <i>A. Pérez-García, D. Hurtado-Maldonado & E. Rojas-González</i>	27
Influence of the presence of a partially saturated layer on the interpretation of field water tests <i>Z. Lafhaj & I. Shahrour</i>	33
Inverse modeling technique for determining unsaturated hydraulic properties of soils <i>A.C.D. Antonino, E. Borges, A.M. Netto, J.R.S. Lima, C.A.B.O. Lira, S.M.G.L. Montenegro & J.J.S.P. Cabral</i>	39
Numerical simulation of infiltration in situ tests: application to unsaturated hydraulic parameters identification <i>A. Abdallah & F. Masrouri</i>	45
Use of HYDRUS-2D to simulate the experiment of drainage accomplished in the alluvial flow plain of the Cajueiro Dam in the semiarid region of northeast of Brazil <i>L.V. Melo, A.M. Netto, A.C.D. Antonino & A.M. Righetto</i>	51
<i>1.2 Contaminant transport, heat and gas flow</i>	
Hierarchy of physical phenomena governing the contamination of subsurface water sources by hydrocarbons <i>E. Dana & I. Shahrour</i>	59
Modelling NAPL transport in unsaturated soils <i>M.L.B. Milfont, A.C.D. Antonino, A.M. Netto, C.J.G. Carneiro, C.A.B. de Oliveira, S.M.G.L. Montenegro & J.J.S.P. Cabral</i>	65
Modeling the geochemical behaviour of an unsaturated clay subjected to heating and hydration <i>L. do N. Guimarães, A. Gens & S. Olivella</i>	71

Effects of heat convection and phase changes on heat and fluid transfer in unsaturated porous media <i>B. Gatmiri & B. Jenab-Vossoughi</i>	77
A fully coupled thermo-hydro-mechanical model for the behaviour of unsaturated porous media <i>N. Khalili & B. Loret</i>	83
A double structure formulation for the THM analysis of engineered barriers and seals <i>M. Sánchez, S. Olivella & A. Gens</i>	89
Modelling gas migration through clays <i>C.H. Delahaye & E.E. Alonso</i>	95
Vapour and gas flow in clay barriers: formulation and analysis <i>B. Valleján, S. Olivella & A. Gens</i>	101
Modeling leachate and gas flow in sanitary landfills <i>B. Caicedo, E. Giraldo & E. Behrentz</i>	107
 <i>1.3 Soil behaviour</i>	
Role of degree of saturation on the normally consolidated behaviour of unsaturated soils <i>D. Gallipoli, A. Gens, J. Vaunat & E. Romero</i>	113
Use of a coupling stress for unsaturated soils <i>E.J. Murray, V. Sivakumar & W.C. Tan</i>	121
An explicit stress integration scheme for unsaturated soil models <i>D. Sheng, D.W. Smith, S.W. Sloan & A. Gens</i>	125
Critical state modelling of unsaturated soils <i>F.C. Silva Filho, M.S.S. Almeida & M.M. Futai</i>	133
Study of the LC yield surface of a residual soil of granulito <i>S.L. Machado</i>	139
Representation and estimation of the shrinkage curve <i>M.D. Fredlund, G.W. Wilson & D.G. Fredlund</i>	145
Anisotropic stress-strain law for wetting-induced soil collapse <i>J.H.F. Pereira, G. de F.N. Gitirana Jr, D.G. Fredlund & M.P.C. Neto</i>	151
Effect of wetting process on the yield limit of a remoulded silt <i>A. Rifa'i, L. Laloui, D. Deschamps & L. Vulliet</i>	159
Mechanical behavior of rock materials due to wetting and their modeling <i>Y. Kohgo, I. Asano & Y. Hayashida</i>	167
PREMISS: Phase Relationship Equation for Moisture Induced Swell in Soils <i>J.-L. Briaud, S. Hoffmann, T. Posey & G. Woodfin</i>	173
Coupled solution for the prediction of volume change in expansive soils <i>V.Q. Hung, D.G. Fredlund & J.H.F. Pereira</i>	181
Expansive soils with deep moisture barriers: modeling and measurements <i>E. Rojas, R. Cervantes & P. Garnica</i>	187
Viscoplastic finite element model for expansive soils <i>H. Elarabi</i>	195
Prediction of soil suction in expansive clay using artificial neural network <i>L. Miao</i>	203
Relationship between soil–water characteristic curve and void ratio <i>T. Sugii, K. Yamada & T. Kondou</i>	209
Modeling the soil–water characteristic curve during wetting and drying cycles <i>E. Rojas</i>	215

Numerical modelling of dam using the modified Cam-clay extended to the unsaturated condition <i>A. Burghignoli, A. Desideri & R. Tamagnini</i>	221
Material behavior of unsaturated soils subjected to cyclic loading <i>H. Meißner & T. Becker</i>	227
Cavity expansion in unsaturated soils <i>A.R. Russell & N. Khalili</i>	233
An analysis of the consolidation of unsaturated soils <i>E. Ausilio, E. Conte & G. Dente</i>	239
Modeling the shear strength of unsaturated soils <i>J. Vaunat, E. Romero, C. Marchi & C. Jommi</i>	245

2. Experimental Unsaturated Soil Mechanics

2.1 Storage characteristics

Influence of grain size distribution and mineralogy of unbound aggregates on soil–water characteristic curves <i>J. Côté, J.-M. Konrad & M. Roy</i>	255
Association of soil–water characteristic curves with genesis and grain size composition of tropical soils <i>E. Vertamatti & F.A.R. Araújo</i>	261
Free and linked water in compacted clay using thermogravimetric analysis <i>X. Guillot, J.-M. Fleureau, M. Al-Mukhtar, & F. Bergaya</i>	265
Soil–water characteristic curves of compacted residual soils <i>E.C. Leong & H. Rahardjo</i>	271
Soil–water characteristic curve of a quasi-saturated compacted soil <i>K.V. Bicalho, D. Znidarcic & H.-Y. Ko</i>	277
Hydro-chemical effects on water retention in bentonite–sand mixtures <i>C. Mata, E. Romero & A. Ledesma</i>	283
Courbes de rétention d'eau d'un profil d'altération <i>J.C. de Carvalho, R.C. Guimarães & J.H.F. Pereira</i>	289
Evaluation of the soil–water characteristic curve equations for soils from Brazil <i>D.M.S. Gerscovich & A.S.F.J. Sayão</i>	295
Hysteresis effects resulting from drying and wetting under relatively dry conditions <i>T. Nishimura & D.G. Fredlund</i>	301
Soil moisture profiles of unsaturated colluvial slopes in alpine regions – North Eastern Italy <i>P. Paronuzzi, M. Del Fabbro & P. Maddaleni</i>	307
A comparison of the soil–water characteristic curves for reconstituted and undisturbed samples of a colluvium from Rio de Janeiro <i>M.L. Melgarejo, A.M. Ridley & K. Dineen</i>	313

2.2 Suction, moisture and degree of saturation

Design and construction of a tensiometer for direct measurement of matric suction <i>A. Tarantino & L. Mongiovi</i>	319
Some factors that influence soil suction measurements using a thermal conductivity sensor <i>F. Shuai, C. Clements, L. Ryland & D.G. Fredlund</i>	325
Measuring the matrix potential of water in the soil through instrumentation installed in mini-lysimeters <i>C.F. Mahler, C.A.R. Mendes, A.P. Souza & N.F. Fernandes</i>	331

Monitoring the field soil matrix potential using mercury tensiometer and granular matrix sensors <i>A.V.F.A. Bertolino, A.P. Souza, N.F. Fernandes, A.M. Rangel, T.M.P. de Campos & C.C. Shock</i>	335
Obtaining the soil moisture characteristic curve of a highly compressible waste submitted to drying <i>L.F.S. Villar & T.M.P. de Campos</i>	339
Measurement of matric suction of loess in Shanxi Province <i>Z. Wang & Y.D. Lao</i>	347
A review of in situ properties of unsaturated soils with reference to suction <i>B.R. Phani Kumar, R.S. Sharma & S. Garg</i>	351
Using time domain reflectometry to determine moisture contents in unsaturated soils <i>G. Trichês & R.S. Pedroso</i>	357
Quantitative analysis of moisture content determination in expansive soils using neutron probes <i>J. Li, D.W. Smith, S.G. Fityus & D.C. Sheng</i>	363
Prediction of degree of saturation in unsaturated soils using image analysis technique <i>R.S. Sharma, M.H.A. Mohamed & B.A. Lewis</i>	369
A method for the in situ measurement of the degree of saturation <i>L. Montrasio</i>	375
 <i>2.3 Gas and water conductivity</i>	
Air conductivity of a heavily compacted swelling clay-sand mixture <i>C. Loiseau, Y.J. Cui & P. Delage</i>	383
Water vapour transfer in highly compacted and unsaturated soils <i>M. Al-Mukhtar</i>	389
The gradient effect on the water flow through a compacted swelling soil <i>C. Loiseau, Y.J. Cui & P. Delage</i>	395
Characterization of the permeability of the loessic soils in the Center of Argentina <i>M.E. Zeballos, E.R. Redolfi, R. Terzariol & R.J. Rocca</i>	401
Unsaturated hydraulic characteristics of pyroclastic soils <i>G. Sorbino & V. Foresta</i>	405
Vegetation induced variability of hydraulic characteristics of an aeolian sand <i>A.B. Fourie, W.S. Mathews & R.P. Hattingh</i>	411
Field measurement of unsaturated soil hydraulic properties using constant head permeability test <i>Y. Takeshita & T. Morii</i>	417
Scale factors for centrifuge modeling of unsaturated flow <i>E. Dell'Avanzi & J.G. Zornberg</i>	425
 <i>Author Index</i>	 431
