Table of contents

Preface XXV
Sponsors XXVII
Conference organization XXXIII

T.Y. LIN LECTURE

Bridge life-cycle performance and cost: Analysis, prediction, optimization and decision making 3
D.M. Frangopol, S. Sabatino & Y. Dong

KEYNOTE LECTURES

Towards a standard policy for structural monitoring in cable-stayed bridges 23
M.A. Astiz

Bridge dynamics and aerodynamics: Design and practical requirements for high structural performance and safety 39
R.C. Battista

Dynamic identification and continuous dynamic monitoring of bridges 59
A. Cunha, E. Caetano, F. Magalhães & C. Moutinho

Implementation of system performance principles in bridge assessment and design 79
M. Ghosn

Design of large bridges for ease of inspection and maintenance and safety against ship impact 91
N. Hussain

Masonry arch bridges in the Italian railway engineering experience: State of condition, static reliability, seismic verification and retrofit strategies 103
C. Modena, G. Tecchio & F. da Porto

Feasibility of a 10,000 m long span suspension bridge 121
M.C. Tang

SHM-based fatigue damage prognosis for long-span cable-supported bridges under multiple dynamic loadings 129
Y.-L. Xu

MINI-SYMPOSIA

Life-cycle performance assessment of existing bridges in an aggressive environment

Organizers: M. Akiyama, D.M. Frangopol & I. Yoshida

Partial factors for reliability-based durability assessment of RC bridges using observational data 145
K. Kano, Y. Odake, M. Akiyama & D.M. Frangopol

Grouping and estimation of deterioration curves of existing bridges 146
I. Yoshida, Y. Ohtake & Y. Honjo

Life-cycle multi-hazard risk assessment of highway bridges 147
Y. Dong & D.M. Frangopol

Life-cycle sustainability of highway bridges 148
S. Sabatino & D.M. Frangopol

Risk-based approach for the optimal management of coastal bridges 149
A. Mondoro, D.M. Frangopol & M. Soliman

Carbonation rate in old structures assessed with air-permeability site NDT 150
K. Imamoto, R. Neves & R. Torrent

Analytical and experimental service life assessment of Hong Kong-Zhuhai-Macau link 151
K. Li & R. Torrent

The role of concrete technology in improving long term bridge performance 152
F. Pacheco, R. Christ & B.F. Tutikian

Cost-based recovery processes and seismic resilience of aging bridges 153
A. Titi, F. Biondini & D.M. Frangopol

Bridge loading – measurement and modelling

Organizers: C. Caprani, X. Ruan, E. O'Brien & A. Nowak

Simplified methodology for dynamic analysis of curved road bridges with structure-vehicle interaction 157
E.P. Schmidt & C.E.N. Mazzilli

Characteristics of traffic loading effects of long-span continuous rigid frame bridge with high piers using micro-scaled traffic model 158
J. Wu, Q. Xiao, P.F. Xu, L.J. Wu & W.S. Han

Effects of increasing design traffic load on performance and life-cycle cost of bridges 159
C. Hanley, D.M. Frangopol, D. Kelliher & V. Pakrashi

Considering traffic growth in characteristic bridge load effect calculations 160
C. Leahy, E.J. O'Brien & A.J. O'Connor

Recent advancements in accuracy and robustness of Bridge WIM systems 161
A. Žnidarič, J. Kalin & M. Kreslin

Effect of vehicle-bridge interaction on bridge seismic response 162
S. Kameshwar & J.E. Padgett

A creation method of lane load characteristic on highway bridges based on deck monitoring video integrated with WIM data 163
Y. Pan, D.L. Wang, A.R. Chen & R.J. Ma

Live load model for refined analysis of short and medium-span bridge systems 164
G. Anitori, J.R. Casas & M. Ghosn

Influence of simplified traffic simulation on the assessment of long span bridge 165
J.Y. Zhou, X. Ruan & X.F. Shi

Vibration problems on design of grid bridges and viaducts and their maintenance 166
P.A. Lipener & R.M.L.R.F. Brasil

Novel techniques regarding the assessment and monitoring of bridges

Organizers: A. Strauss & D.M. Frangopol

Phased array ultrasonic inspection of rib-to-deck welded joints in orthotropic steel decks 169
T. Makita, H. Sakai, T. Suzuki & N. Yagi

Optimization of structural health monitoring and maintenance planning based on Bayesian joint modeling of time-dependent measurements and hazard functions 170
C. Xing, R. Caspeele & L. Taerwe

A structural monitoring framework relying on wireless sensors networks and spectro-temporal compressive sensing 171
R. Klis, E. Chatzi & M. Spiridonakos

Calculation of optimised bridge dynamic amplification factor using bridge weigh-in-motion data 172
J. Kalin, A. Žnidarič & M. Kreslin

Application of system-based correction factors in condition rating of steel-composite bridges 173
G. Anitori, J.R. Casas & M. Ghosn

Nonlinear analyses techniques for the assessment of the track-bridge interaction 174
A. Strauss, B. Täubling, L. Jirovský, K. Bergmeister, M. Šomodíková, D. Lehký, D. Novák & D.M. Frangopol

Structural behavior of damaged arch bridges 175
K. Mendlig, D. Proske, A. Strauss, A. Krawtschuk & O. Zeman

Recommendations concerning the inspection and maintenance of bridges and viaducts 176
J. Pacheco, M. Carvalho & P. Helene

Reliability assessment of concrete columns 177
J. Podroužek, V. Benko, P. Kendický & A. Strauss

Satellite InSAR applicability for monitoring bridge deformations 178
M. Lazecky, I. Hlavacova, M. Bakon, J. Papco, J.J.M. de Sousa & J. Kolomaznik

Smart bridge structural health monitoring

Organizers: B. Glisic, J.P. Lynch, H. Sohn & D. Zonta

Vibration-based damage assessment based on a data driven damage feature 181
L. Martinelli, M. Domaneschi & M.P. Limongelli

Structural health monitoring – a smart timber bridge 182
T.K. Hosteng, B.M. Phares & J.P. Wacker

Multi-sensor structural monitoring of Colle Isarco Viaduct 183
A. Bonelli, A. Beltempo, C. Cappello, D. Bolognani, O.S. Bursi, D. Zonta, C. Costa & W. Pardatscher

Improved structural health monitoring of bridges using digital image correlation 184
J. Winkler & C. Hendy

On-site non-destructive evaluation system for PC structures using X-ray and neutron sources 185
Y. Oshima, M. Ishida, M. Uesaka & Y. Otake

Multiphase mobile sensor network for beam health monitoring 186
T.J. Matarazzo, M. Horner, K. Koser & S.N. Pakzad

Structural reliability methods for bridge safety and maintenance

Organizers: A.T. Beck, S.M.C. Diniz & F. Stucchi

Probabilistic modelling and assessment of railway bridges 189
L. Connolly, A.J. O'Connor & E.J. O'Brien

Reliability analysis of circular RC columns confined by CFRP 190
J.R. Ferreira & S.M.C. Diniz

A stochastic dynamics approach for efficient incremental dynamic analysis 191
K.R.M. dos Santos, I.A. Kougioumtzoglou & A.T. Beck

Fatigue reliability assessment method for concrete girder bridges 192
C.S. Wang, P.J. Zhang, J.W. Zhao, M.S. Zhai & Q. Wang

Performance assessment of strengthened concrete girder bridges based on monitoring data 193
C.S. Wang, P.J. Zhang, X.K. Quan & Q. Wang

Improving the sustainability of a bridge during the retrofitting 194
M. Munoz, M. Iuliano, R. Yadav, B. Chen & B. Briseghella

Rehabilitation, strengthening and management of bridges in Australia

Organizers: N. Powers & R. Al-Mahaidi

Practical risk based approach to determine flood impact 197
N. Powers

Torsional strengthening of concrete bridge girders using the NSM CFRP strips 198
G. Al-Bayati, R. Al-Mahaidi & R. Kalfat

Optimisation of inspection and maintenance activities for bridge components 199
H. Mohseni, H. Tran & S. Setunge

Analysis of flood impact on reinforced concrete (prestressed) girder bridges – a case study 200
F. Kalendher, S. Setunge, H. Mohseni & W. Lokuge

CFRP confinement of concrete columns damaged by high expansion level of alkali-aggregate reaction 201
T. Kubat, R. Al-Mahaidi & A. Shayan

Experimental investigation on CFRP strengthened steel plates with inclined cracks 202
N.J. Aljabar, X.L. Zhao, R. Al-Mahaidi, E. Ghafoori, M. Motavalli & N. Powers

Evaluation and strengthening of New Zealand bridges for increased vehicle loads 203
J. Reynolds

Improving the bond performance of FRP applied to concrete members using mechanical substrate strengthening and FRP spike anchors 204
R. Kalfat & R. Al-Mahaidi

Durability of FRP strengthened reinforced concrete flexural members for bridge structures 205
R.J. Gravina, H. Aydin, S.A. Hadigheh & P. Visintin

Techniques of rehabilitation and strengthening for existing bridges

Organizer: J. Timerman

Carbon-fiber reinforced polymer used in the reinforcement of rectangular openings in the web of reinforced concrete beams 209
E.E. Matar

Fatigue strengthening of riveted girders in a historic railway metallic bridge in Switzerland using pre-stressed un-bonded CFRP laminates 210
E. Ghafoori, M. Motavalli, A. Herwig, A. Nussbaumer, G.S. Prinz & M. Fontana

Safety of existing structures 211
F.R. Stucchi, F. Fanti, J. Carandina & F.L. Blancas

Strengthening of the Chillon highway viaduct deck slab with reinforced UHPFRC 212
E. Brühwiler & M. Bastien-Masse

Determination of the fibre content and orientation in UHPFRC layers using NDT – application to the simulation of the behaviour of strengthened beams 214
M. Pimentel & S. Nunes

Widening and reinforcement of existing concrete bridges – the Brazilian experience 215
J.A.P. Vitório

Suitability of bridges for Tiete-Parana waterway navigational clearance 218
M. Freire & F. Assali

Strengthening an existing bridge using external tendons – the Samambaias River/PR case 219
A. Bertrand

São Vicente Suspension Bridge rehabilitation and cable substitution 221
R. Timerman, H. Corres, F. Prieto & S. Doniak

Research and applications in bridge health monitoring

Organizers: N. Catbas, J. Casas, H. Furuta & D.M. Frangopol

Monitoring of shear cracking in partially prestressed concrete beams by distributed optical fiber sensors 225
G. Rodríguez-Gutiérrez, J.R. Casas, S. Villalba-Herrero & A. Barrias

Accelerated Finite Element model calibration by substructure analysis with parallel genetic algorithm optimization 226
K. Zhou, Z.Y. Wu & M. Cashany

Development of a web interface for structural health monitoring data visualization and structural performance assessment 227
A.B. Colombo & T.N. Bittencourt

Reliability evaluation of reinforced concrete bridges using structural health monitoring 228
A.B. Colombo, T.N. Bittencourt & D.M. Frangopol

Experimental damage identification in a post tensioned concrete beam 229
M.P. Limongelli, D. Siegert, E. Merliot, J. Waeytens, F. Bourquin, R. Vidal, V. Le Corvec, I. Gueguen & L.M. Cottineau

Probabilistic seismic resilience analysis for bridges shocked by near-fault pulse-like ground motions 230
Y. Liu, D.G. Lu & F. Paolacci

An innovation monitoring method of vehicle induced aerodynamic load on sound barrier integrated with photogrammetry and image analysis 232
D.L. Wang, Y. Pan, X. Shen, R.J. Ma & A.R. Chen

Structural health monitoring system design for cable supported bridges: A proposed framework and recommendations 233
J.E. Mayorga & F.A. Cerda

Damage localization through empirical modal analysis on a full scale cable stayed bridge 234
A. Torres & F.A. Cerda

Data mining and analysis of large-scale bridge structure health monitoring 235
H. Tian, C. Chao, M. Hu & X. Jin

On the use of a passing vehicle for bridge health monitoring 236
E.J. O'Brien & A. Malekjafarian

Application of a cross correlation technique for assessment of a non-homogeneous stress field 237
J.L.A.O. Sousa & H. Wiggenhauser

Structural health monitoring of a prestressed concrete bridge in a critical state of conservation 238
C.F. Rodrigues, C.F. Sousa, H. Figueiras & J.A. Figueiras

Monitoring of the Infante D. Henrique Bridge with self organizing maps 239
M. Marcy, G. Doz, F. Magalhães & A. Cunha

Numerical simulation based bridge safety, maintenance and management

Organizers: A.R. Chen & X. Ruan

Evaluation of temperature effect on the dynamic parameters of a laboratory scaled bridge 243
N.A. Guzman & F.A. Cerda

Rehabilitation of Chekiang Road Bridge in Shanghai 244
Y.F. Fang, H. Yan, C.L. Zhang, K. Song & L. Chen

Design proposal for Songpu Bridge: Widening the riveted truss bridge with ortho-composite-slab 245
C.L. Zhang, C.Y. Shao, Y.F. Fang, Q. Wang & Q. Shen

Research on measuring the pre-tension force in bolts using ultrasonic method 246
Y. Zhao, B. Hu & P.F. Zhang

Research on new method for measuring the pre-tension force of bolts 247
Y. Zhao, B. Hu & P.F. Zhang

"Limited" concept based protection-again-vessel-collision design for existing bridges 248
Q.E. Deng, W. Liang, H.W. Lu & Q. Miao

Bayesian updating based resistance model of bridge suspender 249
X. Wang, X. Ruan & K. Zhou

Optimize bridge construction process based on BIM technology 250
X.F. Shi, Z.Q. Liu, X. Yan & Z.Q. Ma

Numerical study on the chloride attack of a concrete cable-stayed bridge 251
X. Ruan, Z. Yin & Z. Pan

Management of major bridges for resilience, safety and maintenance
Organizers: N. Catbas, A.R. Chen, N. Apaydin, L. Feng & X. Ruan

Nonstationary characteristics of Typhoon Fung-Wong observed at Sutong Bridge site based on SHMS 255
H. Wang, T.Y. Tao, Y.P. Zhang & A.Q. Li

Bridge scour risk in a changing climate: A sensitivity analysis 256
H. Dikanski, B. Imam, A. Hagen-Zanker, K. Avery & D. Castlo

An elegant hybrid solution to cross the Bosphorus strait in a mixed-traffic environment within an ever-expanding urban context 257
R. Sorge

Using innovative maintenance to extend lifetime of railway bridges and tunnels 258
J. Wuorenjuuri

The application of health monitoring system for the maintenance of Chinese bridges 259
M.S. Pei & A.R. Chen

Structural health monitoring system-SHMs of the long span bridges in Turkey 260
S. Bas, N.M. Apaydin, A. Ilki & F.N. Catbas

Block travel of heavy duty trucks over a suspension bridge: A case study 261
S.U. Dikmen, E. Safak & N.M. Apaydin

Bridge foundations – structural and geotechnical aspects
Organizers: M.M. Futai, A.D. Gusmão, R.P. da Cunha & R.A. de Oliveira

Structural analysis of pile caps, used in bridge foundation, subject to AAR 265
C.M.T.M. Gameleira, V.Q.G. Nunes, P.A. Régis & R.A. de Oliveira

Study on the stress distribution in the foundation of blocks on four piles, used in bridges 266
V.Q.G. Nunes, C.M.T.M. Gameleira, P.A. Régis & R.A. de Oliveira

A probabilistic evaluation of an integral abutment bridge 267
M. Munoz, B. Briseghella & P. Smaldini

Analysis of pile cap behavior in connection with steel piles 268
R. Burgos Filho, F.C. Zarzar Júnior & R.A. de Oliveira

Numerical staged-construction analysis of precast concrete bridge 269
A.C.F. Leite, F.A.N. Silva & R.A. de Oliveira

Advanced and innovative approaches to bridge management including risk management
Organizers: L. Klatter & R.M. Ellis

Network level risk analysis in bridge management 273
P.D. Thompson

Bridge performance analysis in transportation asset management plans 274
P.D. Thompson

Practical performance measures for bridge management 275
R.M. Ellis, D.J. Evans & C. McElhinney

Tracking bridge conditions versus budgets using bridge management system tools in Prince Edward Island Department of Transportation, Infrastructure and Energy 276
D.J. Evans & R.M. Ellis

Issue approach for medium term renovation and replacement planning 277
G. Klanker, L. Klatter & J. Bakker

A methodology to determine the most sustainable bridge work programs through improved structure level considerations 278
Z. Mirzaei & B.T. Adey

Management of bridges with shallow foundations exposed to local scour 279
N. Tanasic & R. Hajdin

An application of expected utility theory for the optimization of bridge maintenance strategies 280
C. Cappello, D. Bolognani, R. Zandonini & D. Zonta

SPECIAL SESSIONS

Steel bridge rehabilitation

Organizer: M. Sakano

A strengthening theory to prevent fatigue crack initiation in old metallic bridges 283
E. Ghafoori, M. Motavalli, A. Nussbaumer, X.L. Zhao, A. Herwig, M. Fontana & G.S. Prinz

Behavior confirmation and functional evaluation of bridge bearings based on the field measurement 284
N. Shibasaki, C.M. Ikeda & M. Sakano

Rationalization of fatigue cracks inspections in steel bridges through application of eddy current tests 285
L.H. Ichinose, M. Mizue & M. Sakano

Fatigue strength improvement of rib-to-deck joints of orthotropic steel deck by peening 286
T. Ishikawa, R. Matsumoto, J. Rockenbach, H. Kawano & S. Tsutsumi

Fatigue strength improvement by peening from back surface of the weld toe 287
R. Matsumoto, J. Rockenbach, H. Kawano, T. Ishikawa & S. Tsutsumi

Enhancing low-cycle fatigue strength of cruciform welded joints by weld toe grinding 288
K. Kinoshita & K. Ueda

Improving the durability of existing orthotropic steel decks using steel plates and stud bolts 289
A. Sato, A. Tabata & S. Ono

Replacement of cable stays on Tjörn Bridge 290
J. Laigaard, M. Skoglund & A. Maglica

Aging road infrastructure – challenges for owners and operators

Organizer: J. Krieger

Assessing condition of concrete bridge decks by robotic platform RABIT for development of deterioration and predictive models 293
N. Gucunski, B. Basily, J. Kim, T. Duong, A. Maher, K. Dinh, H. Azari & H. Ghasemi

Aging highway bridges – challenges for owners and operators 294
J. Krieger & R. Holst

German guidelines for the re-assessment of existing highway bridges 295
B. Novák

Re-assessment and upgrading strategies for highway bridges – case studies 296
V. Boros

European standardization of quality specifications for roadway bridges

Organizers: J.A.S. de Carvalho, C. Matos & J. Casas

COST Action TU1406 quality specifications for roadway bridges (BridgeSpec) 299
J. Campos e Matos, J.R. Casas & S. Fernandes

European standardization of quality specifications for roadway bridges: An overview 300
J.R. Casas

Performance indicators in assessment of concrete arch bridges 301
A.M. Ivanković, M. Srbić & J. Radić

Quality control plans for road bridges 302
R. Hajdin

Performance goals for roadway bridges 303
I. Stipanovic Oslakovic & G. Klanker

Performance indicators for roadway bridges 304
A. Strauss, A. Vidovic, I. Zambon, F. Dengg, N. Tanasic & J.C. Matos

Quality control of road bridges in Poland 305
J. Bień, M. Kużawa, M. Gładysz-Bień & T. Kamiński

Bridges for high-speed railways

Organizers: R.A.B. Calçada, J.M. Goicolea & T.N. Bittencourt

Dynamic evaluation considering the vehicle-structure interaction of a railway bridge subjected to heavy axle load trains 309
L.R. Ticona Melo, T.N. Bittencourt, D. Ribeiro & R.A.B. Calçada

Influence of track irregularities in the global and local dynamic response of precast decks under railway traffic loads 310
J. Malveiro, C.F. Sousa, R.A.B. Calçada & D. Ribeiro

Damage identification of a railway bridge based on genetic algorithms 311
A. Meixedo, R.A.B. Calçada, V. Alves, D. Ribeiro & A. Cury

Field measurements of maglev train-induced vibrations 312
Z.-L. Wang, S.-W. Chen, Y.-L. Xu & G.-Q. Li

Development and application of Weigh-In-Motion (WIM) technology for bridge structures

Organizers: H. Nassif, T. Bittencourt & D. Su

Live loads in condition assessment of old bridges 315
T. Kamiński, J. Bień, M. Kużawa & J. Zwolski

Evaluation of toll rate using Weigh-In-Motion data for Korean expressway 317
Y. Choi, S. Kwon & S. Lee

Evaluation of overweight enforcement system using the high-speed Weigh-In-Motion in Korea expressway 318
S. Kwon, Y. Choi & S. Lee

Development of the high speed Weigh-In-Motion system using double diagonal sensor array 319
S. Kwon, Y. Choi & S. Lee

Live load predictions based on daily maximum vehicle weight from Weigh-In-Motion (WIM) data 320
H. Nassif & D. Su

Characterization of truck traffic in New Jersey based on 20 years of Weigh-In-Motion (WIM) data 321
D. Su & H. Nassif

Calibration of Weigh-In-Motion system considering temperature effects 322
E.-S. Hwang & D.Y. Kim

Accelerated Bridge Construction (ABC) – innovations and implementations
Organizers: U.B. Attanayake, H. Aktan & R. Dissanayake

Foundation solutions for accelerated bridge construction 325
U.B. Attanayake & H.M. Aktan

Substructure solutions for accelerated bridge construction 326
A.P. Ranasinghe

Monitoring bridge moves 327
A.W. Mohammed, U.B. Attanayake & H.M. Aktan

Experimental testing of high and low damage seismic resistant connections for Accelerated Bridge Construction (ABC) 328
M. Mashal & A. Palermo

Retrofitting of damaged bridges – the sustainable solution 329
R. Dissanayake & C. Bandara

Prefabricated vs cast-in-situ concrete bridges in a whole life perspective 330
P. Linneberg & J.S. Jensen

Bridge networks maintenance, safety, reliability, resilience, and sustainability
Organizers: P. Bocchini & M. Pozzi

Maintenance and seismic retrofit cost assessment of existing bridges 333
M.A. Zanini, L. Hofer, F. Faleschini, P. Franchetti & C. Pellegrino

Value of information analysis for typical bridge network topologies 334
C. Malings & M. Pozzi

Metrics and algorithm for optimal retrofit strategy of resilient transportation networks 335
A. Karamlou, P. Bocchini & V. Christou

Seismic resilience of aging bridges and transportation networks 336
L. Capacci, F. Biondini & A. Titi

Sensitivity of network-level seismic performance measures to the bridge fragility model adopted 337
F. Cavalieri, P. Franchin, A. Lupoi & S. Tesfamariam

Seismic loss assessment of deteriorating bridge networks 338
M.A. Zanini, F. Faleschini & C. Pellegrino

Monitoring and evaluation of railway bridges
Organizers: E.-S. Hwang & H. Nassif

Long term monitoring of traffic action effect of a short span RC railway bridge for safety examination 341
V. Grigoriou & E. Brühwiler

Experimental investigation on the beam-slab connection behavior of a damaged real railway bridge 343
A.P.C. Neto, E.P. Lima, R.P. Hune, T.N. Bittencourt, A.B. Colombo & C.T. Yanagihara

Deflection and acceleration measurements for high speed railway bridges 344
E.-S. Hwang, D.Y. Kim & S.-M. Kim

Reliability analysis of PSC-I girder railway bridge based on measured train axle loads 345
I. Yeo & K.H. Kim

Characteristics of live load for railway bridges based on statistical analysis of WIM data 346
I. Paik, S.M. Park, G.O. Kim & I.H. Yeo

Deterioration and assessment of steel bridges 347
P. Ryjáček, M. Macho, V. Stančík & M. Polák

Fatigue assessment of centenarian railway bridges 348
H. Nassif, P. Lou & D. Su

Structural health monitoring (SHM) for load rating of an existing railroad bridge 349
H. Nassif, P. Lou & D. Su

Bridge maintenance and strengthening – the Portuguese experience
Organizers: P.J.S. Cruz & L.O. Santos

Tests of a railway bridge before and after stressing of strengthening bars 353
J. Rodrigues & M. Ledesma

Extending the life of centenary metal bridges 354
P.J.S. Cruz

Mitigation and monitoring of the structural effects due to internal expansive reactions in concrete 356
L.O. Santos, E. Pereira, A.S. Silva & A.B. Ribeiro

Train-bridge dynamic interaction on a stone masonry railway bridge 357
P. Jorge, D. Ribeiro, C. Costa, A. Arêde & R.A.B. Calçada

Experimental assessment of the components and materials of stone arch railway bridges 358
A. Arêde, C. Costa, A. Topa Gomes, J. Menezes, R. Silva, R. Gonçalves & M. Morais

GENERAL SESSIONS

Advanced materials

Behavior of bridge decks under drying shrinkage using large-scale testing 361
Y. Tung, R. Hindi, A. Ibrahim, W. Lindquist & D. Tobias

Tensile behavior by Weibull analysis in binary, ternary and quaternary concretes designed with micro and nano-silica additions 362
L.E. Zapata-Orduz, G. Portela & O.M. Suárez

Steel-UHPC lightweight composite bridge girders for long-span bridges 363
X.D. Shao & L. Deng

Self-centering bridge column with CFRP tendons under seismic loads 364
A. Mohebbi, M.S. Saiidi & A. Itani

Shear behavior of ultra high performance concrete beams 365
C.M. Powell, M.P. Manning, B.D. Weldon, M.J. McGinnis, A.J. Giesler, D.V. Jauregui & C.M. Newtson

Reliability-based scheduling and selection of maintenance actions with application to the FRP strengthening of RC bridge girders 366
D.Y. Yang, D.M. Frangopol & J.G. Teng

Evaluation of a material model for sliding springs in modular bridge expansion joint systems 367
F. Artmont & S. Roy

Solution to hydration heat problem in bridge abutments and piers 368
M. Kaszynska & S. Skibicki

No-cement eco-binder as a potential material for bridge construction 369
H.-A. Nguyen, T.-P. Chang, C.-T. Chen & Y.-W. Liu

Sustainable strengthening of RC members with high performance concrete overlays 370
N. Randl, M. Steiner & M. Peyerl

Aging and deterioration modeling

Time-dependent probabilistic modeling of corrosion propagation for service life prediction in RC structures 375
E.L. Portela, T.N. Bittencourt & A.T. Beck

Influence of corrosion on membrane action in reinforced concrete slabs 376
W. Botte, R. Caspeele & L. Taerwe

Environmental durability of FRP to steel bonded joints in bridges 377
M. Heshmati, R. Haghani & M. Al-Emrani

Remaining strength evaluation method of plate girders with corroded flange under sleepers 378
K. Fujii & N. Asao

Accounting for observation-specific correlation in deterioration modeling of bridge components using binary probit models with random effects 379
Y. Qiao, M. Moomen, Z. Zhang, T.U. Saeed, B. Agbelie & S. Labi

Discrete-outcome modeling of bridge component deterioration: Accounting for the effects of maintenance and observation-specific correlation using random effects 380
T.U. Saeed, Y. Qiao, M. Moomen, S. Labi & A. Ahmed

Analytical and numerical modeling of the influence of aggregate on cement mortar diffusivity 381
Z. Jiang, Y. Xi, X. Gu, Q. Huang & W. Zhang

Assessment and evaluation

Protection, repair, and rehabilitation of deteriorated reinforced concrete bridges: A comprehensive overview considering seismic vulnerability 385
A. Pipinato

First applications of structural redundancy in Chilean bridges 386
P.I. Figueroa & M.A. Valenzuela

Finite element analysis of soil-steel arch bridge 387
D. Beben & A. Stryczek

Analysis of exterior bridge girder rotation due to eccentric construction loading using TAEG software 388
J. Schmeltz, Md. Ashiquzzaman, R. Hindi, W. Lindquist & A. Ibrahim

Parametric study of the ductility capacity in common highway bridges 389
M.C. Gómez-Soberón, A. Ayala-Contreras, G. Mendoza-García & L. Gómez-Soberón

Evaluation of reinforced concrete arch bridges 390
L.L.-Y. Lai

Nonlinear structural analysis of floating bridges 391
E.B. Junyent, F. Biondini & A. Titi

An examination of the seismic performance of rocker pier bridges in Japan's oldest expressway 392
S. Li, Y. Ikawa, Y. Takahashi, T. Ohshiro & M. Hashinoki

Vehicle loading and effects on orthotropic steel deck of Runyang Bridge based on WIM data 393
Z. Zhang, R.J. Ma & B. Hua

The influence of mechanical properties variation of natural rubber seismic isolators on the fragility results for multi-span concrete bridges 394
G.H. Siqueira, A.S. Sanda & P. Paultre

Development of robust software tool for steel railroad bridge rating 395
D.W. Jacobs, S. Dhakal, R.B. Malla & Z.Y. Wu

Assessment of the conservation status and suggestions of alternatives to the rehabilitation of Marcos Konder bridge, at Itajaí-SC, Brazil 396
K.C. Jordão & A.J. Beber

Effect of transverse load distribution on the influence lines given by a bridge weigh in motion system 397
S. Heinen, R.C.A. Pinto & P. Junges

Implementation of load rating provisions for highway arch bridges 398
A.P. Ranasinghe & Y. Tokal

Fragility curves of single column bridges retrofitted with RC jackets 399
B.A. Olmos, J.M. Jara & M. Jara

Implementation plan for load rating prestressed concrete bridges without plans 400
C.V. Aguilar, D.V. Jauregui, B.D. Weldon & C.M. Newtson

Finite element model updating for short-span bridges using vehicle load input-deflection outputs 401
K.Y. Koo, J.M.W. Brownjohn, S.H. Kim & J.J. Lee

Fragility of the reinforced concrete bridge subjected to carbonation induced corrosion 402
B. Sun, R.C. Xiao & J. Cheng

Research on improved fuzzy TOPSIS method of bridge state assessment 403
Q.H. Yu, R.C. Xiao, B. Qu & L.J. Jia

Comparative study among hybrid (steel & concrete) and pre-stressed concrete in the dimensioning of a railroad bridge superstructure 404
G.J.O. Rodrigues, W.F.R. da Silva Junior & J.A.O. Vicente

Reduced partial factors for assessment in UK assessment standards 405
C. Hendy, L.S. Man, R.P. Mitchell & H. Takano

Analytical modelling and evaluation for restoration studies of historic Buzlupınar timber bridge 406
E. Çabuk, A. Türer & N. Şahin Güçhan

Structural collapse analysis of a Bailey bridge 407
F. Biondini & P.G. Malerba

Investigation of loading rate effects in reinforced concrete bridge piers by using slow and real-time hybrid simulations 408
Y. Chae, M. Park, C.Y. Kim & Y.S. Park

Risk assessment of reinforcement concrete arch bridge in cantilever casting construction 409
L. Deng & W. He

A collapse induced by shortening in a multispan viaduct 410
P.G. Malerba, M. Quagliaroli & D. Scaperrotta

Design checks and nonlinear response of a full 3D model of a box girder bridge 411
M. Partovi, G.J. Schreppers, A. de Boer & N.S. Galgoul

Remaining service life assessment of river bridges with cracked members 412
S. Özdemir, N. Topkara, A. Yakut, U. Akyüz & A. Caner

Nonlinear analysis for the investigation of rail–bridge interaction considering temperature effects 414
A. Strauss, M. Šomodíková, D. Lehký, D. Novák & D.M. Frangopol

Long lasting high performance steel bridge research progress and engineering application 415
C.S. Wang, C.Y. Ou, N. Xia, M.S. Zhai, L. Duan & E. Brühwiler

Experimental study on bending behavior of innovative hollow tubular flange composite girders 416
C.S. Wang, Z.Q. Cui, J.W. Zhu, L. Duan & X.L. Zhai

Damage assessment for the structural rehabilitation of a trussed bridge on Ferrovia do Aço Railway 417
J.F.S. Rodrigues, P.A. Almeida, J. Junqueira, R. Montoya & M. Botelli

Cable-stay bridges – investigation of cable rupture 418
T.N. Nguyen & V. Samec

Retrofit design of a Brazilian bridge subjected to storm surge and wave loads 419
B. Montelato, G.T.A. Leite, L.D. Brunialti & P.H.C. de Lyra

Seismic performance of corroded concrete bridge piers 420
C. Fang, Z. Yuan, S. Yang & J. Zhang

Numerical prediction of punching behavior of RC slabs using 3D nonlinear FE analysis 421
J. Shu, M. Plos, K. Zandi & M. Johansson

Comparison seismic performance of high damage and low damage bridge piers subjected to corrosion via experimental cyclic tests 422
K. Andisheh, A. Scott & A. Palermo

Safety evaluation of a large-span double-deck cable-stayed steel bridge under fire 424
Y.S. Liu & G.B. Lou

Deteriorations of concrete structures in Gunkan Island 425
K. Imamoto, K. Shimozawa & T. Noguchi

Design codes

Automatic system of early diagnosis for hinge joint diseases of hollow slab bridge 429
X.J. Kong, S.Y. Li & Z.L. Wang

Analysis and evaluation of seismic performance of bridges using displacement-based design methods 430
R.W. Soares, S.S. Lima & S.H.C. Santos

Structural health monitoring approach for detecting ice accretion on bridge cables using the autoregressive model 431
J. Andre, A. Kiremidjian, Y. Liao, R. Rajagopal & C.T. Georgakis

Bridges in Juiz de Fora City 432
M.T. Barbosa, J.A.B. Castañon, C.V.G. Coura, B. Silva, H. Oliveira & P. Fidelis

Extrapolation of measurement results during dynamic testing of high speed railway bridges 434
P. Olaszek

Impact factors for fatigue design of steel girder bridges 435
W. Wang, L. Deng & X.D. Shao

Failure analysis and maintenance proposal for the bridge over "Quebrada de Tambura" (Imbabura-Ecuador) 436
K.P. Flores & E.O.L. Lantsoght

Application development for assessment of moments in bridge slabs 437
G. Khouri, M. Serapião & S. Cardoso

Update in values of traffic effects on Brazilian short span bridges 438
C.E. Rossigali, M.S. Pfeil & L.V.S. Sagrilo

Diagnostic

Bridge performance measures: Robustness – redundancy 441
P.S. McCarten

Bridge management system in India 442
S.C. Joshi & S. Joshi

Implementing the next generation of bridge inspection and management systems 443
J.K. Shaffer, L.D. Tanase, B.D. Witter & T.W. Gilmore

Asset management framework considering climate change impacts and traffic growth 444
A.D. Orcesi, H. Chemineau & A.J. O'Connor

Economic indicators to assess the bridges of rehabilitation 445
M. Pitonak & L. Pepucha

Life-cycle bridge performance analysis and management under earthquake hazards 446
A.P. Chassiakos & P.K. Tsikas

Bridge management system for the Dirección de Vialidad de la Provincia de Buenos Aires 447
D.J. Cernuschi, G.A. Soprano, G.J. Bandel & D. Federico

The structural integrated safety management system in the E'dong Yangtse River Bridge 448
W. He, L. Deng, L. Tang & Q. Li

Fatigue and fracture mechanics

Numerical study to investigate web-gap distortion of an existing retrofitted bridge 451
M. Motaleb, N. Duong, R. Hindi, W. Lindquist & A. Ibrahim

Determination of uncertain design parameters of post-tensioned composite bridge 452
D. Lehký, M. Šomodíková & M. Lipowczan

Large bridge "in pérgola" for high speed trains to the northwest of Spain 453
C.J. Cabañes

Seismic fragility and loss curves to repair the bridge Motin de Oro in Mexico 454
D. De Leon, C. Gomez & C. Cruz

Bridge knowledge management using ontologies 455
R. Helmerich

Analysis and rehabilitation of the Generale Franco Romano viaduct 456
L. Lafranconi, G. Massone, G. Pasqualato & M. Deiana

Probabilistic methodology for an efficient safety assessment of high-speed railway bridges 457
J.M. Rocha, A.A. Henriques & R.A.B. Calçada

Durability limit states and reliability analysis of concrete components in long-span bridges 458
P. Wei, R.C. Xiao, B. Sun & D. Zhuang

Field testing

Overall assessment of an ASR affected overpass "Robert-Bourassa/Charest" after nearly 50 years in service 461
L.F.M. Sanchez, B. Fournier, J. Bastien, D. Mitchell & M. Noël

Seismic vulnerability of retrofitted bridges 462
J.M. Jara, O. Álvarez, M. Jara & B.A. Olmos

Effect of hinged joint damage on vehicle-induced dynamic response for simply supported multi-slab girder bridges 463
Y. Li, Z. Wu & T. Xu

Fire on Łazienkowski Bridge – 423 m long steel bridge with an orthotropic deck 464
H. Zobel, W. Karwowski, M. Wróbel & P. Mossakowski

Detection of cracks and loss of mass in concrete through 3D point clouds generated by Terrestrial Laser Scanner 465
B.W. Voigt, F. Bordin, P. Gorkos & M.R. Veronez

Study of damage beams via stiffness estimate obtained statically 467
P.P.M. Carvalho & W.S. Assis

Literature review of conditions and methods of repairing concrete bridges 468
C.C. Wajdowicz, P.S. Monteiro, A. de P.L. Santos & M.L. Santos Filho

Long-term corrosion behavior of bridges: Case studies 469
I. Pepenar

Estimation of concrete compressive strength through ultrasonic waves with different frequencies applied to a concrete bridge 470
F.B. de Lima, J.F. Fernandes, M.C. Sahuinco & T.N. Bittencourt

Deflection and vibration monitoring for serviceability of road bridges 471
E.-S. Hwang, X.H. Le & D.Y. Kim

Foundations

Viaduct construction with movable scaffolding system: New sequence 475
J.R.D. de Terán, V.G. Haach, J. Turmo & J.J. Jorquera-Lucerga

Construction of viaducts with movable scaffolding system: Comparative between the traditional sequence and new sequence 476
J.R.D. de Terán, V.G. Haach, J. Turmo & J.J. Jorquera-Lucerga

Improved structural design of bridges approach concrete slabs 477
M.N. Darwish

Analyzing the effects of the evolutionary erection in the service state of cable-stayed bridges built on temporary supports 478
J.A. Lozano-Galant, D. Xu & J. Turmo

Bridge information modeling: A systematic literature review 479
P.S. Monteiro, C.C. Wajdowicz, A. de P.L. Santos & M.L. Santos Filho

LRFD preliminary design charts for simple and two-span continuous prestressed concrete bridges 480
J. Márquez, D.V. Jauregui, B.D. Weldon & C.M. Newtson

Health monitoring

Estimating Markov transition probabilities for reinforced concrete bridges based on mechanistic-empirical corrosion models 483
N. Lethanh, J. Hackl & B.T. Adey

Influence of reinforcement corrosion on moment and shear resistance in time of RC bridge girder 484
P. Koteš & J. Vičan

Determination of corrosion of the steel reinforcement and application to a bridge structure 485
P. Koteš, M. Brodňan & J. Vaněrek

Damaging of a reinforced concrete bridge due to dynamic effects of vehicles 486
T. de O. Abeche, R.D. Machado, J.E.A. Filho, F.L.M. Beghetto & L.A.F. de Souza

Multivariate regression modeling of bridge deterioration: Identifying factors influencing deterioration over the life-cycle 488
R. Goyal, M.J. Whelan & T.L. Cavalline

Multi-sensor monitoring applied to a stress-ribbon footbridge 489
A. Barrias, S.H.C. Santos, A.A. Henriques, J.A. Figueiras, C. Félix & A. Pestana

Experimental study on monitoring the shear degradation of reinforced concrete members 490
J. Stoerzel, N. Randl & A. Strauss

Life-cycle assessment

Fatigue evaluation of rib-to-deck weld joints of orthotropic steel deck based on LEFM 495
X. Wei, Y.D. Li & S. Jiang

New cycle counting method for the assessment of low cycle fatigue in steel H-piles of integral bridges 496
M. Dicleli & M. Karalar

Simulation of low cycle fatigue performance of steel H piles via finite element approach 497
M. Karalar & M. Dicleli

Fatigue property analysis of steel box girder based on monitoring data 498
S. Xu, R.J. Ma, A.R. Chen & H. Tian

Fatigue analysis of reinforced concrete bridges from monitoring data 499
P. Junges, R.C.A. Pinto & L.F.F. Miguel

High-cycle fatigue of reinforced concrete bridges based on monitoring data 500
L.C. Meneghetti, A.B. Colombo, R.M. Teixeira & T.N. Bittencourt

Mixed-mode fatigue crack propagation rates of current structural steels applied for bridges and towers construction 501
J.A.F.O. Correia, S.M.O. Tavares, P.M.G.P. Moreira, P.J.S. Tavares, A.M.P. De Jesus & R.A.B. Calçada

Design guidance for improved life cycle performance of highway bridges 502
L.S. da Silva, H. Gervásio, U. Kuhlmann, P. Maier, A.D. Orcesi & N. Robert

Disease assessment method of steel box girders considering multi factors 503
Z.Q. Fu, Z. Ye, B.H. Ji & Y.X. Wang

Detection method to fatigue crack geometric feature in orthotropic steel deck 504
Z.Y. YuanZhou, B.H. Ji, C.Y. Zhang & Z.Q. Fu

Loading (earthquake, accidental & other)

Seismic analysis of abutments on bridges strengthened by the method of tied-arch 507
M.A. Valenzuela & L. Riquelme

Study on seismic performance assessment of railway bridges 508
J.Y. Park & D.K. Kim

Research on the seismic design strategy of self-anchored suspension bridges 509
Y. Zhang, H. Wei, J. Shen & Z. Wang

Investigation of fatigue in steel H-piles of integral bridges subjected to intense seismic ground motions 510
M. Dicleli & M. Karalar

Analytical study on behavior of existing suspension bridges during large-scale earthquakes 511
H. Matsuda, T. Mazda & T. Imamura

Pre-test studies on seismic soil-abutment interaction in skewed bridges 512
B. Abdollahi, M.S. Saiidi, R.V. Siddharthan, S. Elfass & A. Shamsabadi

Estimation of the seismic vulnerability of a roundabout road bridge near Bucharest 513
I.R. Răcănel, M. Daraban & V.D. Urdăreanu

Influence of seismic code updates on the dynamic response of existing bridges in Romania 514
